

SolusVM

SolusVM Deployment course on Plesk University

We are glad to announce that we have released a new public online course - [SolusVM Deployment](#). In this course, students are guided through the process of SolusVM deployment and setting up WHMCS to start selling virtual server solutions. We hope that the course will be helpful to all SolusVM customers. Registration and access to the course in Plesk University are free, just follow [this link](#) to create an account or log into using an existing one

>Welcome to the SolusVM Documentation!

If you have any questions regarding the wiki, please ask on the forums or If you need support directly, please open a ticket in your [Client Area](#)

The screenshot displays the SolusVM web interface. The top navigation bar includes links for Dashboard, Virtual Servers, Clients, Resellers, IP Blocks, Nodes, Plans, Media, Configuration, Tools, and Log. The user is logged in as Mr Admin on 20 August 2013 at 9:00 AM.

System Information (Server: localhost):

- Disk Usage:** 3.58 GB of 920.2 GB Used / 870.24 GB Free (1%)
- Memory Usage:** 1.52 GB of 1.94 GB Used / 429.79 MB Free (78%)
- Swap Usage:** 20.83 MB of 4 GB Used / 3.98 GB Free (1%)

Cluster Statistics:

Total OpenVZ Virtual Servers	6
Total Xen PV Virtual Servers	7
Total Xen HVM Virtual Servers	8
Total KVM Virtual Servers	12
Total Nodes	11
Free IPv4	301
Used IPv4	42
Free IPv6	863
Used IPv6	137
