

Database Backup

Backup via UI

1. Go to **SolusVM > Tools > Database**
2. Click **Download** or **Send to Email**

Database backup will be downloaded or sent to admin email

Backup via CLI

1. Login to the Master node via SSH as root
2. Execute the following command to create a backup:

```
MYSQL_PWD=`cat /usr/local/solusvm/includes/solusvm.conf | awk -F ":" '{print $3}'` mysql_dump -u`cat /usr/local/solusvm/includes/solusvm.conf | awk -F ":" '{print $2}'` `cat /usr/local/solusvm/includes/solusvm.conf | awk -F ":" '{print $1}'` > solusvmdb.sql
```

Alternatively, use the automated script as per instruction: [How to create a backup of SolusVM database](#)
