

Troubleshooting

- In case of any issues before or during the installation, check `/var/log/yum.log`, and also make sure that server is up-to-date:

```
# yum update
```

- In case of any issues after the installation, check `/tmp/install.log` file and search through <https://support.solusvm.com>
- Try starting SolusVM installer in the following manner to get more verbose output:

```
# sh +x install.sh
```
