

Serial console installation

1. Connect to SolusVM Master server over SSH.
2. Install the required packages:

```
# yum install libgcc libgcc zlib zlib svmstack-nginx svmstack-nginx-serial-console-config svmstack-ssh-  
websocket net-tools
```

If installation fails due to non-existing svmstack-* packages, install SolusVM repository:

Enterprise Linux 6 (CentOS 6, Scientific Linux 6, RedHat 6)

SSH:

```
# rpm -ihv http://repo.solusvm.com/php7/centos/6/os/x86_64/solusvm-release-6-6.noarch.rpm
```

Enterprise Linux 7 (CentOS 7, Scientific Linux 7, RedHat 7)

SSH:

```
# rpm -ihv http://repo.solusvm.com/php7/centos/7/os/x86_64/solusvm-release-7-6.noarch.rpm
```

And then install the packages.
